PROFESSIONAL SUMMARY

Product Engineer with 3+ years of hands-on experience building full-stack web applications end-to-end from system architecture to production deployment using Next.js, React, TypeScript, Supabase, and PostgreSQL. Highly skilled in async, remote-first workflows across multiple concurrent B2B engagements, with a track record of shipping production systems in under 8 weeks that cut operational overhead by 40%+ and measurably move business metrics. Seeking high-impact roles as Full-Stack Engineer, Frontend Engineer, or Product Engineer where I can build highly autonomous and reliable digital products.

CORE COMPETENCIES & TECH STACK

Frontend Architecture	Next.js (App Router, Server Components) React.js TypeScript Tailwind CSS Web Performance
Backend & Cloud	Laravel Supabase PostgreSQL Node.js Vercel / Edge Functions REST API Design Docker
Dev Practices & Security	Git/GitHub CI/CD Pipeline Unit Testing OAuth / JWT Agile/Scrum Remote-First Async Workflows
AI & Automation	AI-Assisted Development (Cursor/Copilot) n8n (Advanced Workflows) Webhooks LLM Integration
UI/UX & Collaboration	Product Management Figma Linear/Jira Notion Mixpanel GA4

PROFESSIONAL EXPERIENCE

Product Engineer & Growth Lead / Chogo Coffee May 2026 – Present

- Designed and shipped a full-stack F&B operations platform (Next.js App Router + Supabase) from zero to production in 8 weeks — consolidating POS, HR attendance, and loyalty modules into a single system, replacing 5+ spreadsheet workflows and cutting daily reconciliation time from ~4 hrs to under 90 minutes.
- Architected 7 production n8n automation workflows integrating REST APIs across inventory, scheduling, and reporting — eliminating ~12 hrs/week of manual overhead and compressing team task cycle time from 3 days to under 6 hours.
- Instrumented GA4 + Mixpanel across 3 customer touchpoints to identify funnel drop-off; executed 3 A/B experiments on acquisition flow that drove a 25% lift in monthly foot traffic over 60 days — validated via cohort analysis.

Full-Stack & Automation Engineer / PT Ngulik Teknologi Digital Mar 2026 – Present

- Delivered 30+ monthly creative assets across 5+ national B2B campaigns with 100% on-time SLA for 12 consecutive months — while concurrently engineering 2 active production products, demonstrating async workload management across parallel tracks.
- Built and shipped a zero-maintenance social publishing pipeline using n8n + Instagram/TikTok APIs with webhook-driven triggers — reclaiming 10 hrs/week of manual scheduling overhead and scaling content throughput 40% with no additional headcount.
- Ran 5 iterative content experiments across Instagram and TikTok using performance analytics; identified top-performing content formats that drove a 35% increase in aggregate social reach over 3 months, contributing to a 20% follower growth.

Head & Mentor of UI/UX Division | *Tahungoding*

2024 – 2025

- Led end-to-end architecture and delivery of 3 internal platforms on Next.js + Supabase, replacing 4 legacy tools — documented migration ADRs asynchronously and tracked deliverables via Linear with async weekly updates to a 15-person team, cutting sprint cycle time from 14 → 10 days with zero synchronous standups required.
- Engineered and delivered a comprehensive UI/UX engineering curriculum to upskill 40+ university students, earning the 1st Place "Best Mentor" award (out of 11 instructors) for actionable tech education.

Web Developer Intern | *BBPPMPV Cimahi*

Apr 2022 – Jun 2022

- Built and deployed a Laravel CRUD web application to replace a manual spreadsheet workflow processing 50+ daily records; decreased average data processing time by 60% (from ~45 min to ~18 min per batch) and eliminated data entry errors entirely within the first 30 days of deployment.

TECHNICAL PROJECTS

- **Archival AI Knowledge Base & Retrieval-Augmented Generation (RAG) Pipeline (Next.js App Router, Supabase pgvector, n8n, OpenAI/Claude API):** Architected and engineered a self-hosted RAG pipeline and meeting intelligence tool for async remote teams. Built an automated workflow for document ingestion, semantic search, and generating vector embeddings into pgvector via n8n webhooks; rendered a stream-first chat interface with token-to-token response time under 2 seconds and real-time inline citation cards, reducing knowledge retrieval time from async thread-searching (~15 min) to under 30 seconds per query.
- **Chogo Coffee F&B Superapp (Next.js App Router, Supabase, Tailwind CSS):** Engineered a comprehensive POS and business management ecosystem integrating finance, HR attendance, and loyalty/marketing modules. Consolidated 5+ fragmented legacy tools, automated database interactions via Edge Functions, and slashed financial reconciliation time by ~50% while driving a ~20% increase in customer retention.
- **Affligen AI Affiliate Generator (n8n, APIs, LLM Integration):** Architected an automated affiliate asset generation product for PT Ngulik to scale digital marketing. Leveraged dynamic data integrations to automate link/copy creation, reducing setup time by 40% and increasing conversions by ~30%.
- **Tahungoding Core Web (Next.js App Router, TypeScript, Supabase):** Engineered a centralized community portal to streamline organizational onboarding, successfully accommodating and managing 100+ active users.

EDUCATION & ACADEMIC RESEARCH

Universitas Sebelas April (UNSA) | *B.S. in Informatics*

2023 – 2027

- GPA: 3.90/4.00. Absolute grades (A) in 10+ core subjects including Web Programming, AI, and IoT.
- Academic Impact: Authored and published "Analisis Usability Aplikasi MPP Sumedang Berdasarkan Model Jakob Nielsen dan Pengaruhnya terhadap Kepuasan Pengguna Menggunakan PLS-SEM" (2025) on Google Scholar (145+ Public Views), demonstrating rigorous analytical and UX research capabilities.

SMKN 1 Sumedang | *Software Engineering (RPL)*

2020 – 2023

- Graduated with "Outstanding" predicate in Web Competency Exam; developed 5+ software prototypes.

AWARDS & CERTIFICATIONS

- **Awards:** 1st Place (2024) & 2nd Place (2025) University Innovation Challenge for applied tech solutions.
- **Cloud, AI & Data:** LLM & Gen AI (Google Cloud), 8x Cloud Computing & ML Badges (Google Cloud), Data Analytics (Microsoft), Data Science Basics (Dicoding).
- **Business & Language:** Digital Marketing Strategy (Microsoft), 20-Hour TOEIC Preparation (WELTS).
